Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 5-9, 15-16 and 24 are rejected under 35 U.S.C. 102(e) as being anticipated by Nair et al. (US 2002/0103921).

1. Regarding claims 1 and 15-16, Nair discloses an apparatus (fig. 2,) for providing packet forwarding (para. 14) comprising a service termination card (fig. 2, item 120; para. 106) having a packet forwarding engine for receiving and forwarding packets in accordance with an FIB (para. 33, last four lines), first and second control processors running asynchronously (fig. 2, items 170; fig. 5; paras. 31 and 104) having associated forwarding information bases (para. 30), and a means for the packet forwarding engine to forward packets in accordance with the first and second information base depending on the integrity of processes running on the respective processors (para. 104).
2. Regarding claim 5, the apparatus has an input/output interface (fig. 2, OC-48c, Gigabit, 10 Gigabit, etc. connections of the line cards).
3. Regarding claim 6, the apparatus comprises an OAM workstation (para. 27, lines 12-14; para. 78).

Art Unit: 2666

4. Regarding claims 7-8, the forwarding information base is an IP forwarding information base (para. 14; para. 30 - note: routing information base; para. 4; para. 11, lines 1-3) or an MPLS forwarding information base (para. 46 lines 5-6).
5. Regarding claim 9, the apparatus comprises a FIB manager (fig. 4, item 430; para. 107) for receiving FIB information and storing the information on a card.
6. Regarding claim 24, the hot-swapping is due to maintenance (para. 104, last four lines).

Allowable Subject Matter

7. Claims 2-4, 10-14, 17-23 and 25-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
